JIAXING BROOKHILLS PLASTIC PRODUCTS CO.,LTD

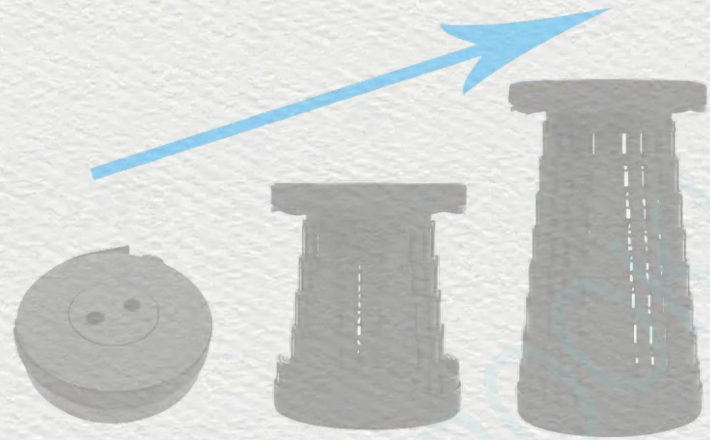

Company Brief

JiaXing Brookhills Plastic Products Co.,Ltd new established in 2025. It is a comprehensive production enterprise specializing in the research, development, production, and sales of injection moldings and plastic household products.

Relying on the good industrial chains and highly concentrated production materials advantages in central of Zhejiang Province, our company is continuously developing and absorbing product technical personnel, building an excellent sales and service team, and integrating its own advantages with the advantages of the local industrial chain.

In addition, in order to develop products that truly meet market demands, the company has hired multiple senior practitioners in the mold industry as consultants. Our company closely tracks the technology and industry development characteristics of the plastic industry, continuously optimizes and updates existing products, ensuring that our customers and friends get the highest quality service and the best investment return. At the same time, we are always the reliable long-term partner for our customers
